

## NANOKERATIN SMOOTHING AND DE-FRIZZ TREATMENT

The revolutionary Nanokeratin System professional hair treatment uses nano-molecular Cashmere Keratin particles to redefine the natural state of your hair and create an enduring blow-dry that lasts up to 12 weeks. A natural substance, Keratin is the primary protein of skin, hair and nails, thus giving hair the ability to return to its healthy, shiny, smooth state and making it especially beneficial for damaged hair. Results are visible immediately. The Nanokeratin System can be used on all hair types (virgin, coloured, bleached, highlighted, permed or relaxed).

## OLAPLEX HAIR STRENGTHENING & REPAIR TREATMENT

This revolutionary new colour upgrade service has become a sensation amongst Hollywood's 'A' celebrities and across the world.

Olaplex seeks out and helps to rebuild the broken disulphide bonds within the hair that can break during chemical processes, particularly colouring or using thermal heated tools. These important disulphide bonds are the bonds that give elasticity and strength to the hair.

This chemistry has never been seen before and opens up brand new possibilities in hairdressing colour variations.

Use Olaplex as a pre-treatment or alongside colouring or lightening services, we recommend using it on bleaching and highlights, you won't look back!
